## DETAILED ACTION

### *Response to Amendment*

1. The Amendment After Final submitted on April 8, 2005 has been entered in the above-identified application. Claims 20, 41, 45, and 46 have been amended. **Claims 1-51 are pending of claims 1-19 and 28-38 have been withdrawn from further consideration.**

The indicated allowability of claims 25, 26, 40, 45 and 46 is withdrawn in view of newly discovered references and hence the finality of the rejections of the last Office action, dated February 8, 2005, is withdrawn. Any inconvenience to the Applicants is regretted. Rejections based on the newly cited reference(s) follow.

### *Claim Rejections - 35 USC § 102*

2. Claims 20-27 and 39-51 are rejected under 35 U.S.C. 102(b) as being anticipated by Lauer et al. (US 5932,350).

Lauer et al. (US 5,932,350) disclose a method for tandem coating substrate, such as cellulosic substrates, with both highly crosslinked thermoset coatings and aqueous based coatings (Column 1, lines 1-9). The substrate may be coated first with the cured coating (ii) and then the highly crosslinked coating (i) which is preferably formed from a thermoset material that is UV curable and which before cure may be a high solids composition or a waterborne composition (Column 2, lines 31-51). The UV curable coatings, after exposure to UV radiation, produce highly crosslinked coatings. It has proved difficult to adhered water-based topcoats without the use of an intermediate

coating (Column 3, lines 1-6). With regards to the stripability rating limitations, the Examiner takes the position that such property limitations must be inherently present in the coatings taught by Lauer et al. given that the chemical composition of the coatings as taught by Lauer et al. and as claimed in the instant application is identical. All limitations of the claimed invention are either disclosed or inherent in the above reference.

### ***Response to Arguments***

3. Applicant's arguments, filed on April 8, 2005, with respect to the rejection of claims 20, 22-24, 27, 39, 41-44, and 47-51 under 35 U.S.C. 102(b) as being anticipated by Bolgiano et al. (US 4,421,782) have been fully considered and are deemed persuasive. Hence, the above rejection has been withdrawn.
